

# 12.22.02 - Ekkicxls

Duncan Brown, ZenLux

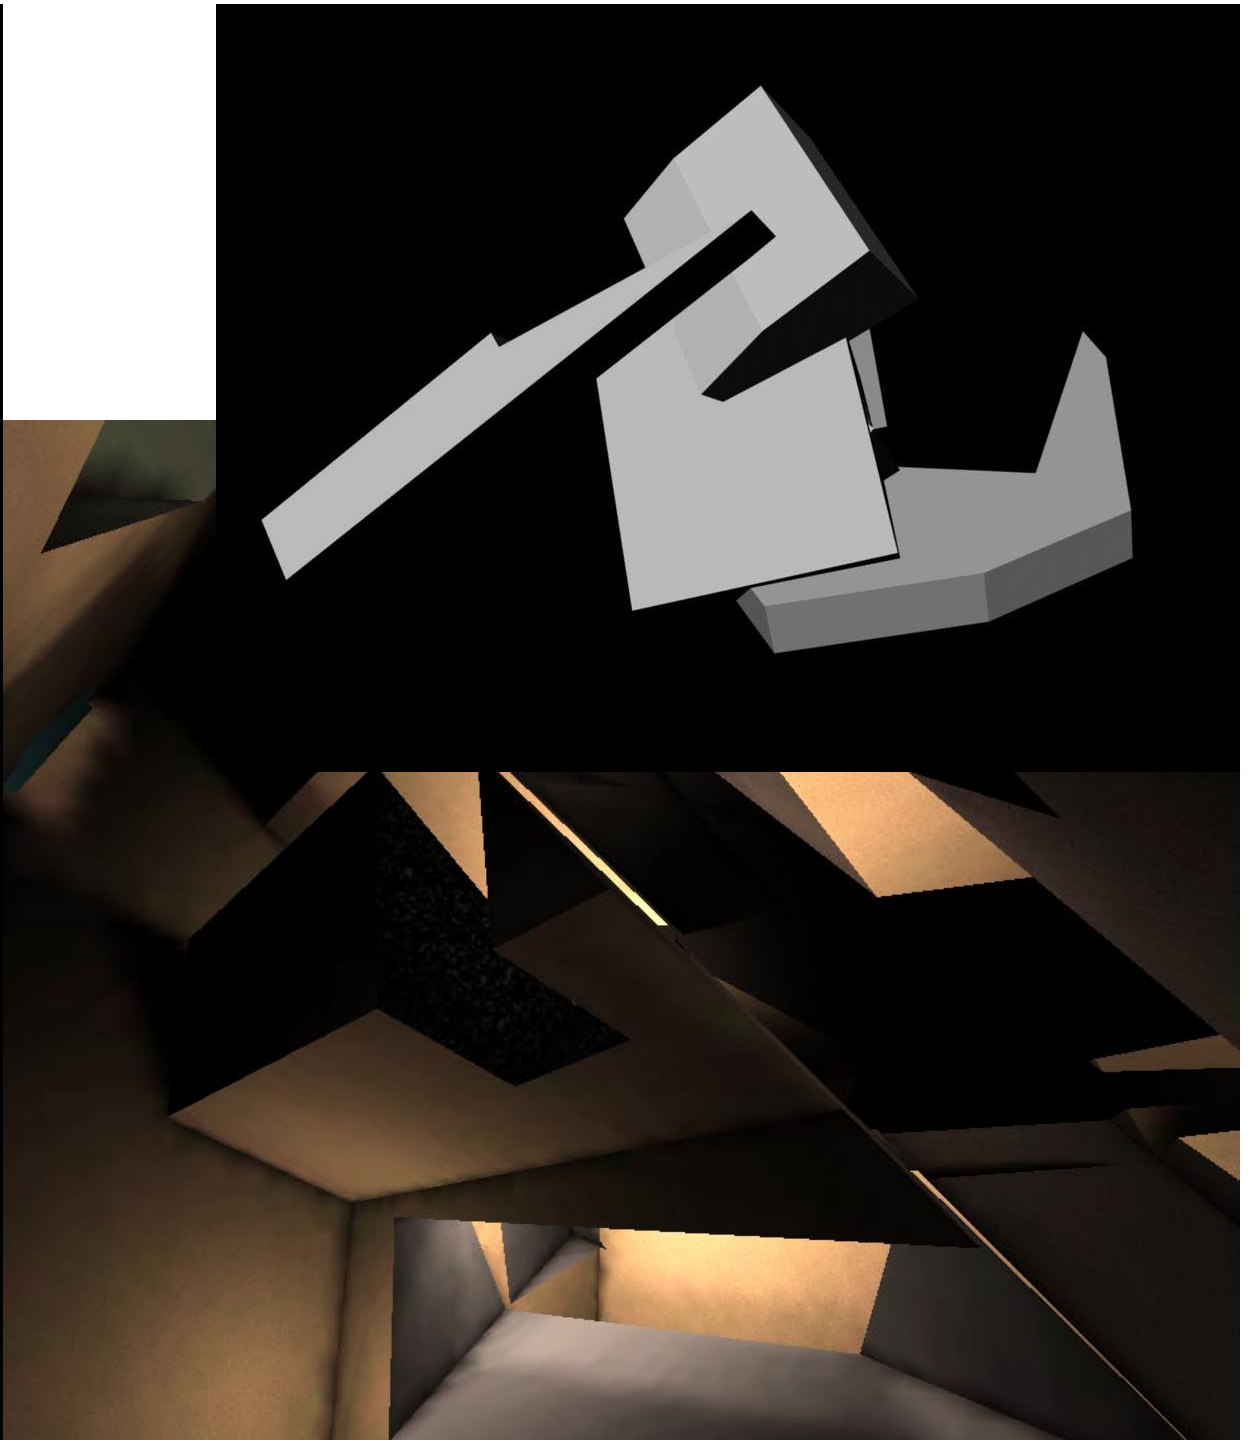

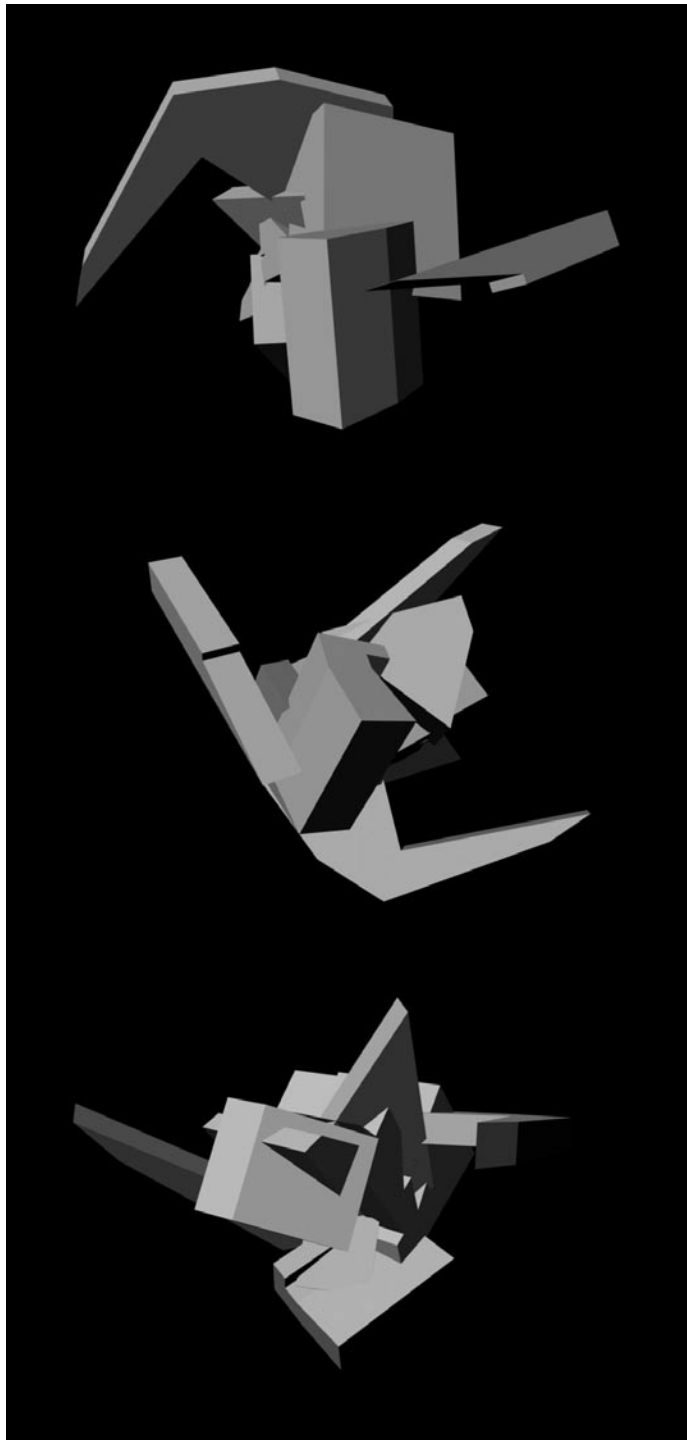

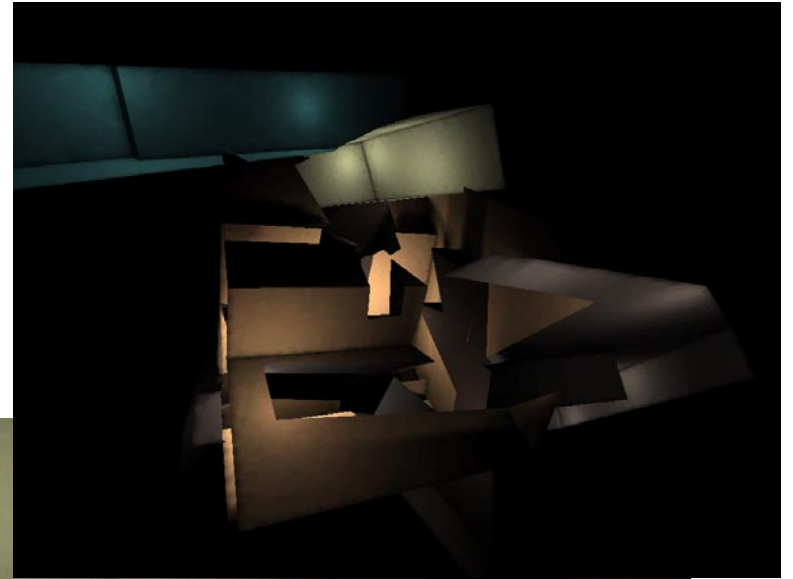

## *Ekkicxls* or *e-cage*

is a further manual attempt at executing ideas from the Generator 2.0 series. Form, quantity, color, position, orientation and scale are determined by a random number generator. This is a link

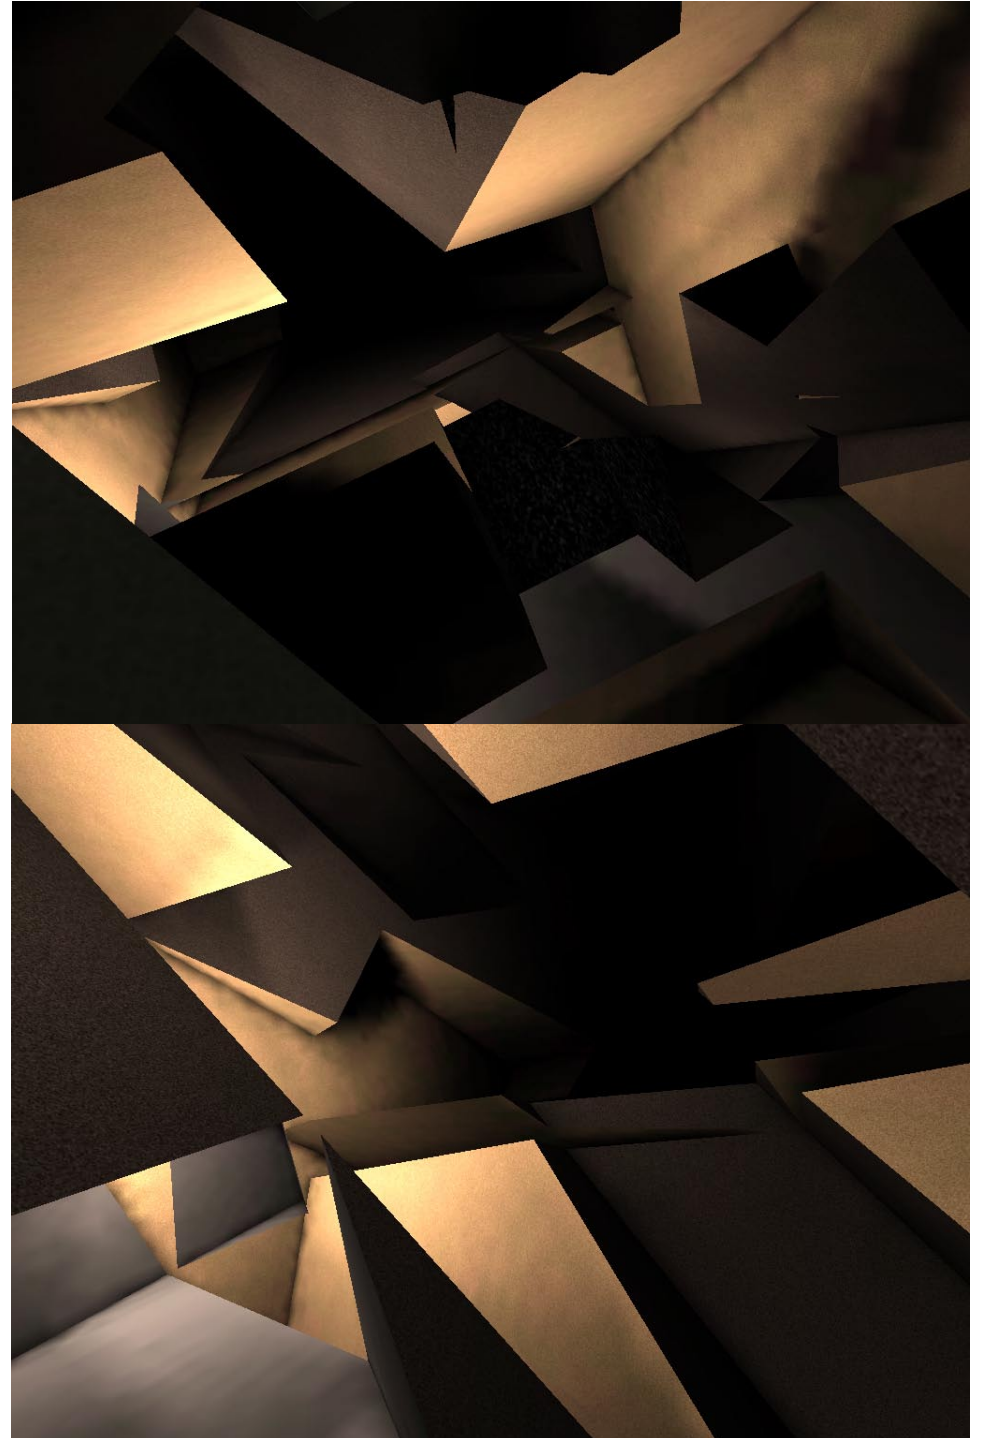

back to broken, and broken2 (rVN #14) – a recurring theme of spelling out words in space.

*e-cage* was created in Maya, and then exported to the Unreal Tournament 2003 engine.
